Lenorable Victor L. Andree House of Appropriatives ashington 25. D. C.

Star Mr. Animan:

Thank you for your letter of 16 February 1959 requesting our views on it. . . 4986. To provide for the establishment, under the Pational letunes Foundation, of a Pational Science Academy.

external programs which would encourage atody in eclantitic fields by offering incentives to your men and women, by establishing sultable salary levels for trained actentists and by praviding better facilities and equipment for actuallic rindy, are objectives which i ical are desirable. However, agreefly recommendations as to bee those objectives can best be attained would be outside the jurisdiction of our organization.

I goint out in passing, recalling your discussions with us regarding deriet evicatific advances, that the fevict Academy of commens is cancilerably different from that proposed in M. A. 4986. The USST Academy is concerned with actualitic training in the more advanced areas, that is at the graduate, research level rather than in the undergraduate areas.

If we may be at further assistance concerning Soviet programs of this type, please do not benitate to call on us.

thearely,
